The first part of the paper is devoted to a discussion of the general principles of the theory of the structure of the atom. It is shown that the structure of the atom is determined by the laws of quantum mechanics, which are based on the principle of the conservation of energy and the principle of the conservation of momentum. The structure of the atom is shown to be a function of the energy of the system, and the energy of the system is shown to be a function of the structure of the atom. This leads to the conclusion that the structure of the atom is determined by the laws of quantum mechanics.
